

Request for Proposal
Lackawanna County Board of Commissioners
Vaccine Medical Services
Proposals are due by Monday April 19, 2021 by 11:00 AM

Questions asked and answers 4/15/2021

1. If there are 1-3 vaccination sites, will there be 1 mass location with a consistent schedule and then the others sporadically added to the schedule? *Yes it is intended to use one mass location and sporadic vaccine events to service targeted areas or populations*
2. The range of 300-3,600 vaccines administered each day will vastly vary the number of nurses and clerical staff needed. Will a calendar be provided with the locations and target administered vaccines needed at each site? How much advance notice will be given? *Scheduling will be based on the availability of vaccines and vaccine demand in the County. Vaccine viabilities are released to providers every Monday. The County and the successful proposer shall develop a calendar for vaccine events. It is anticipated that vaccine events shall be scheduled at least one week in advance.*
