

Afghanistan

Many service members, Veterans, military-connected families, and caregivers are feeling a wide range of emotions as the tragic events unfold in the fall of Afghanistan. These events may be triggering, and increased support for mental health, substance use disorders, and overall well-being is more important than ever. SAMHSA's Service Members, Veterans, and their Families (SMVF) Technical Assistance (TA) Center stands ready to help state and community leaders rally around those who have served. Our TA team is composed of Veterans, family members, caregivers, and dedicated individuals who are called to serve those who have sacrificed so much for our country. We want you to know that you are not alone. Reach out to those around you for support. We are all in this together.
