

Questions from after the RFQ Meeting:

1. Am I correct that each yellow link in the map is configured as follows:
2x500 Mbps, full duplex, i.e., each link consists of two RFU's per tower,
and each RFU has a capacity of 500 Mbps full duplex?
Each RFU has a capacity of 698Mbps and give the link 1.396 Gbps (full duplex).
2. What is the capacity of the orange link – the one between LCGC and Jessup/911?
Each RFU is 1.2Gbps (full duplex) for a total of 2.4Gbps (full duplex).
